

Activity Monitor

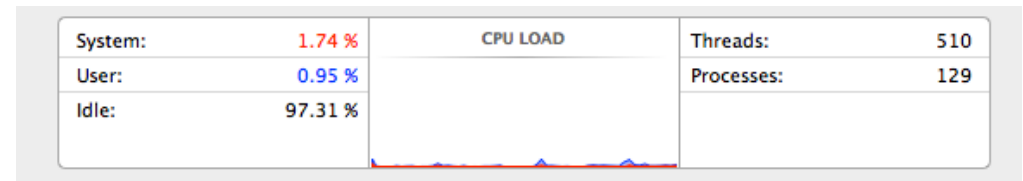

An image is worthier than thousands words

Below is a side by side show of the graphical information of Activity Monitor for CPU, DISK and MEMORY resources of your Mac computer in the two latest MAC OSX versions: Mountain Lion and Mavericks.

Mountain Lion

Mavericks

The following questions were easily responded by Mountain Lion's activity monitor with the displayed information:

1. Number of cores.
2. Disk Usage of the Internal and External Hard Disks.
3. Memory Used and Free. In Mavericks you have to do the math.
