Pixel 6 is powered by Google Tensor, the first processor custom-made for Pixel. It's fast, smart and secure. And it adapts to you.

Pixel's very own powerhouse.

Google's new custom-built chip keeps your phone fast, your games rich and your personal info safe.

Brand new cameras for your best photos ever.

Capture more light and detail in every shot,[1] get rid of distractions,[2] and keep fast-moving subjects in focus.

Fast, smart and personalised for you.

Experience Pixel in a whole new way, with an all-day adaptive battery,[3] proactive help and fluent Live Translate.[4]

Advanced security helps you feel safe every day.

Backed by the new Titan M2™ security chip, five years of updates and Security hub, your privacy and protection is built into Pixel.[5]

1 Compared to the main rear camera on Pixel 5. 2 Magic Eraser may not work on all image elements. 3 Maximum battery life based on testing using a mix of talk, data, standby and use of other features. Battery life depends upon many factors and usage of certain features will decrease battery life. Battery testing was conducted by a third party in California in mid 2021 on pre-production hardware and software, using default settings. Battery testing was conducted using two major operator networks using sub-6 GHz non-standalone 5G (ENDC) connectivity. Actual battery life may be lower. 4 Not available in all languages or countries. Not available on all media or apps. See g.co/pixel/livetranslate for more information. 5 Android security updates for at least five years from when the device first became available on the Google Store in the US. See g.co/pixel/updates for details.

Pixel's very own powerhouse.

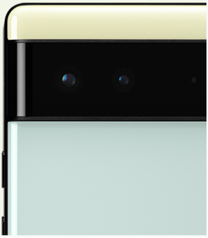
Google Tensor is the first chip made by Google, just for Pixel. It's the same chip used in Pixel 6 Pro, so it helps keep your phone running smoothly and efficiently.

Smarter chip for a smarter phone.

Incredibly intelligent machine learning helps you do things like translate messages and videos without Internet.[1]

Adds a boost of camera magic.

Google Tensor’s custom image processor lets Pixel's brand new camera capture fun times and starry nights just how you remember them.[2]



Powers the most powerful Pixel phones.

Up to 80% faster performance, so apps load quicker and gaming is more responsive.[3] Plus, it saves power so your battery lasts longer.

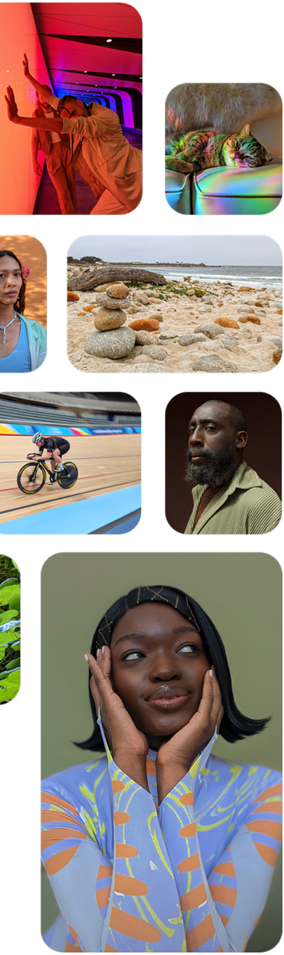
Your protection, built into Pixel.

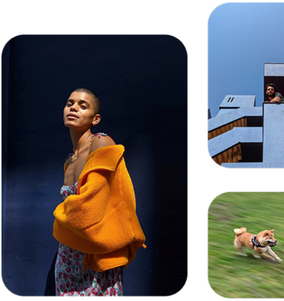
Google Tensor has an extra layer of protection and works with the next-gen Titan M2™ security chip to keep Pixel even more resilient to attacks.[4]

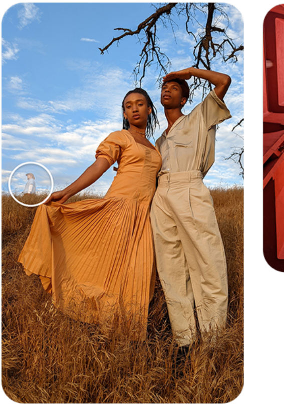
1 Internet connection required during setup only. 2 See g.co/pixel/astrophotography to learn more. Requires a steady surface or tripod. 3 Based on internally conducted benchmark testing. 4 Compared to earlier models of Pixel phones.

Brand new cameras for your best photos ever.

The brand new 50-megapixel camera has bigger sensors to help you capture more colour, more detail and 150% more light than Pixel 5.[1] And with the ultrawide lens on the back, get even more of your world in the shot.







Say goodbye to photobombers.

Magic Eraser makes distractions disappear with a few taps.[2] Remove strangers and unwanted objects in Google Photos, so the people and places that you capture remain the true stars.

Take authentic, accurate portraits.

Portraits on Pixel highlight all people and the nuances of different skin tones beautifully and authentically.

Pixel captures your favourite faces without the blur.

Turn great moments into great photos with Face Unblur, which can de-blur a face to make it sharper.[3]

Portrait mode brings an artful blur to the background.

With portrait mode, you can artfully blur out the background to help your subjects stand out in professional-style portraits.

Motion Mode adds more action to your action shots.

Motion Mode helps you capture crazy skateboarding tricks and wild beach waves in full motion. And add extra depth to make the scene come to life even more.

1 Compared to main rear camera on Pixel 5. 2 Magic Eraser may not work on all image elements. 3 Deblurring may not work on all photos or videos with faces.

An all-day battery you'll love.

Prioritises power for your favourite apps.

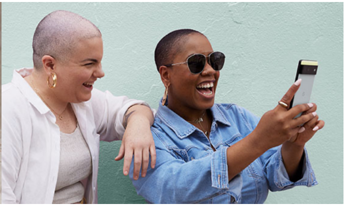
Pixel's all-day Adaptive Battery is everything a battery should be.[1] It learns your favourite apps, so it doesn't waste power on ones you rarely use.

Can stay powered on for days.

When you turn on Extreme Battery Saver, the battery can last up to 48 hours, so there's power when you really need it.[2] You can even control which apps run while it's on.

1 Maximum battery life based on testing using a mix of talk, data, standby and use of other features. Battery life depends upon many factors and usage of certain features will decrease battery life. Battery testing was conducted by a third party in California in mid 2021 on pre-production hardware and software, using default settings. Battery testing was conducted using two major operator networks using sub-6 GHz non-standalone 5G (ENDC) connectivity. Actual battery life may be lower. 2 Maximum battery life based on testing using a mix of talk, data, standby and use of limited other features that are default in Extreme Battery Saver mode (which disables various features including 5G connectivity). Battery testing conducted using two major mobile networks. Battery testing was conducted by a third party in California in mid 2021 on pre-production hardware and software using default settings, except that Extreme Battery Saver mode was enabled. Battery life depends upon many factors and usage of certain features will decrease battery life. Actual battery life may be lower.

Made to last. Made to be brilliant.



Ready for life's little accidents.

Pixel 6 is built from Corning® Gorilla® Glass Victus,™ the toughest Gorilla Glass yet, with up to 2x better scratch resistance than previous Pixel phones.[1] And with IP68 protection, it can take on water and dust with no problems.[2] So it's just as durable as it is beautiful.

The display adapts to you.

The 6.4" Smooth Display adjusts to what you're doing.[3] Its high refresh rate means more responsive gaming and scrolling. And high brightness mode lets you watch and play in bright sunlight.

1 Compared to Pixel 5 and Pixel 4a (5G). 2 Designed to comply with dust and water protection rating IP68 under IEC standard 60529 when each device leaves the factory but the device is not water- or dust-proof. The accessories are not water- or dust-resistant. Water resistance and dust resistance are not permanent conditions and will diminish or be lost over time due to normal wear and tear, device repair, disassembly or damage. Dropping your device may result in loss of water/dust resistance. Liquid damage voids the warranty. See g.co/pixel/water for details. 3 Measured diagonally; dimension may vary by configuration and manufacturing process. Smooth Display is not available for all apps or content. Smooth Display automatically adjusts to optimise for best viewing and battery performance.

Speak fluent Spanish. Or Japanese. Or French.

Explore the world in other languages. Get your chats translated in real time, listen to podcasts with translated captions and even use your camera to read signs in up to 55 languages.[1] No Internet needed.[2]

Translate to English

¡Hola Maya!

Soy Sophie, la amiga de Lucy. Estoy organizando una fiesta de cumpleaños para Lucy y me gustaría invitarte.

---

1 Camera-based translation using Lens is available in 55 languages. Language availability may be more limited for other Pixel translation features. Not available in all languages or countries. Not available on all media or apps. 2 Internet connection required during setup only.

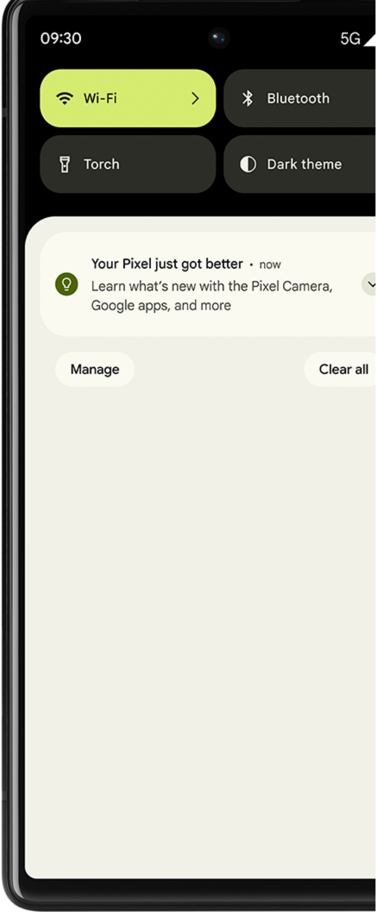
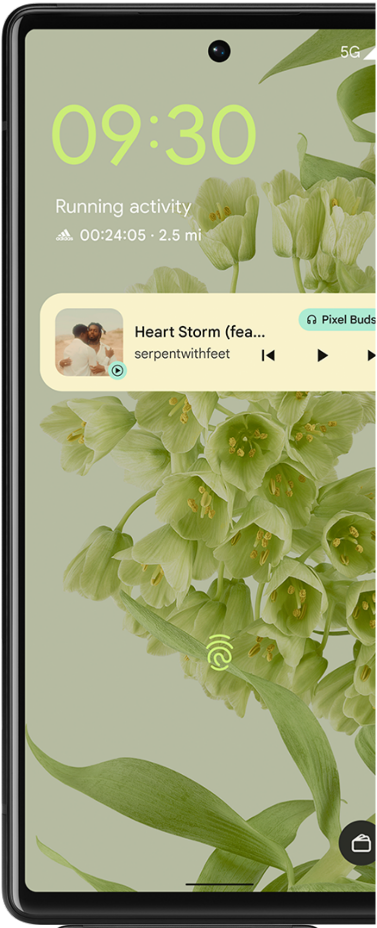
Pixel learns what you need and puts it front and centre.

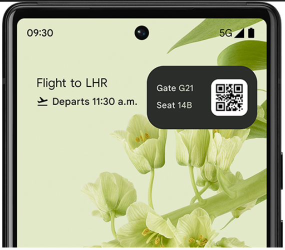
At a Glance shows you the apps and info that you need, right when you need it – like when you get to the airport, your boarding pass will pop up on your screen.[1]



Your Pixel just got better • now

Learn what's new with the Pixel Camera, Google apps, and more





1 Boarding pass feature requires a Gmail account and an Internet connection.

Advanced security helps you to feel safe every day.

The updated privacy and security features help to ensure that you, your personal data, photos and everything else on your phone
